Subject: Let the Market Work!

I continue to be amazed by the ongoing litigation related to Microsoft. From my view if there is any anti-competitive activity going on it is that perpetrated by the DOJ, a few State AGs, and a limited number of companies that made some poor business choices and now what MSFT penalized because of their lack of wisdom. It is time for the DOJ and the courts to put a stop to this judicial extortion against MSFT. As a tax payer, let's allocate our legal resources to stopping terrorism, going after the Enron's of the world and get off the back of the only true innovator company in the last 40 years who has created unprecedented wealth for our country, the public, business and their share holders.
